CONTENTS OF PREVIOUS VOLUMES

Volume 1

Recent Advances in Electrothermal Atomization in Graphite Furnace Atomic Absorption Spectrometry
R. E. STURGEON and C. L. CHAKRABARTI

Analysis of Glasses and Ceramics by Atomic Spectroscopy
W. M. WISE, R. A. BURDO and J. S. STERLACE

Analysis of Soils, Plants, Fertilizers and Other Agricultural Materials
D. J. DAVID

Application of Atomic Absorption Spectrometry in the Paint Industry
C. W. FULLER

Background Correction in Atomic Absorption Analysis
R. A. NEWSTEAD, W. J. PRICE and P. J. WHITESIDE

Analytical Atomic Spectroscopy of Metallurgical Materials. I. Carbonates, Refractories, Slags, Oxides and Sulphides
C. B. BELCHER

Analysis of Portland Cement
R. F. CROW and J. D. CONNOLLY

Atomic Absorption Spectrometric Determination of Metallic Elements in Pharmaceutical Products
F. ROUSSELET and F. THUILLIER

Volume 2

Atomic Fluorescence Spectrometry: Basic Principles and Applications
N. OMENETTO and J. D. WINEFORDNER

Trace Element Analysis of Food and Beverages by Atomic Absorption Spectrometry
F. L. FRICKE, W. B. ROBBINS and J. A. CARUSO

Determination of Trace Metals in Ultrapure Water
K. S. SUBRAMANIAN and C. L. CHAKRABARTI

Interferences in Flame Spectrometry, Their Elimination and Control
I. RUBESKA and J. MUSIL

Emission Spectroscopic Analysis using Cool Flames, Part 1. A Review of External Vapour Generating Systems for Molecular Emission Cavity Analysis (MECA)
E. HENDEN, N. POURREZA and A. TOWNSHEND

Volume 3

Analysis of Nuclear Energy Materials
G. BAUDIN

Thermodynamic Study of Gaseous Monocyanides by Electrothermal Atomic Absorption Spectrometry
B. V. L'VOV and L. A. PELIEVA

Multielement Atomic Fluorescence Spectroscopy
A. H. ULLMAN

Analytical Atomic Spectroscopy of Metallurgical Materials — II. Non-ferrous Alloys
K. J. DOOLAN and C. B. BELCHER

Analytical Capabilities of Atomic Spectrometric Methods using Tunable Lasers: A Theoretical Approach
H. FALK

Analytical Applications of Spectra of Diatomic Molecules
K. DITTRICH

Chemical Reactions in Atom Reservoirs used in Atomic Absorption Spectroscopy
W. FRECH, J.-A. PERSSON and A. CEDERGREN

Zeeman Effect Atomic Absorption
K. YASUDA, H. KOIZUMI, K. OHISHI and T. NODA

Volume 4

The Analysis of Biological and Clinical Materials
H. T. DELVES

Analysis of Coal, Coke, Ash and Mineral Matter by Atomic Spectroscopy
J. C. MILLS and C. B. BELCHER

Sampling and Analysis of Metals in Atmospheric Particulates by Graphite Furnace Atomic Absorption Spectrometry
B. N. NOLLER, H. BLOOM and A. P. ARNOLD

Radioisotope Induced X-Ray Fluorescence
J. J. LABRECQUE

Discrete Sampler Nebulization in Atomic Spectroscopy
M. S. CRESSER

Interferences in Electrothermal Atomic Absorption Spectrometry, Their Elimination and Control
J. P. MATOUSEK

Lamps and Sources for Analytical Atomic Spectroscopy
J. V. SULLIVAN

Analysis of Petroleum and Petroleum Products by Atomic Absorption Spectroscopy and Related Techniques
V. SYCHRA, I. LANG and G. SEBOR

Volume 5

Analysis of Biological Materials using Plasma Atomic Emission Spectroscopy
J. M. MERMET and J. HUBERT

Theoretical Aspects of Organic Solvent Enhancement Effects in Atomic Spectroscopy
M. S. CRESSER

Emission Spectroscopic Analysis using Cool Flames. Part II. A Review of Practical Applications of Molecular Emission Cavity Analysis (MECA)
A. C. CALOKERINOS and A. TOWNSHEND

ICP–AES at the Beginning of the Eighties
J. P. ROBIN

Exploding Conductors as Atomization Cells and Excitation Sources for Atomic Spectroscopy
R. D. SACKS, J. M. GOLDBERG, R. J. COLLINS and S. Y. SUH

Photoacoustic Spectroscopy
M. J. ADAMS

The Limiting Factors for Intensity and Line Profile of Radiation Sources for Atomic Absorption Spectrometry
H. FALK

Graphite Furnace Interferences, A Guide to the Literature
W. SLAVIN and D. C. MANNING

Evaluation of Emission Spectrograms
K. ZIMMER, GY. HELTAI and K. FLORIAN

Volume 6

Influence of Furnace Design on Operation, Sensitivity and Matrix Interferences in Electrothermal Atomic Absorption Spectrometry
S. R. LAWSON, F. G. DEWALT and R. WOODRIFF

Electrothermal Atomic Absorption Spectrometry with Metal Atomizers
M. SUZUKI and K. OHTA

Applications of Hydride Generation Techniques in Atomic Absorption, Atomic Fluorescence and Plasma Atomic Emission Spectroscopy
T. NAKAHARA

Analyte Distribution and Reactions within a Graphite Furnace Atomizer
J. A. HOLCOMBE and G. D. RAYSON

The Hollow Cathode Emission Source: A Survey of the Past and a Look into the Future
S. CAROLI

Temperature Measurements in Flames — A Review
M. L. ELDER and J. D. WINEFORDNER

Volume 7

The Editors and Editorial Advisory Board —1984

High Voltage Discharges: Diagnostics and Opportunities
A. SCHEELINE

Summary of the Usefulness of Signal-to-Noise Treatment in Analytical Spectrometry
M. S. EPSTEIN and J. D. WINEFORDNER

Laser Vaporization in Atomic Spectroscopy
K. DITTRICH and R. WENNRICH

Principles of Laser-Enhanced Ionization Spectrometry in Flames
J. C. TRAVIS, G. C. TURK, J. R. DEVOE, P. K. SCHENCK and C. A. VAN DIJK

Models in Electrothermal Atomization: The Platform Atomizer
S. L. PAVERI-FONTANA and G. TESSARI

Microwave-Induced Plasmas: Implementation and Application
J. P. MATOUSEK, B. J. ORR and M. SELBY

Equidensitometry — A Method for Plasma Diagnostics in Atomic Spectroscopy
K. DITTRICH and K. NIEBERGALL

A Study of Sample Volatilization in a Graphite Furnace by Means of Atomic and Molecular Absorption Spectra
E. M. SEDYKH and YU. I. BELYAEV

Image Sensor Applications in Analytical Atomic Spectroscopy
S. W. MCGEORGE and E. D. SALIN

Volume 8

Inductively-Coupled Plasma Mass Spectrometry (ICP-MS)
D. J. DOUGLAS and R. S. HOUK

A Critical Appraisal of Shortcuts in Flame Spectroscopy
M. S. CRESSER, C. E. O'GRADY and I. L. MARR

Zeeman Atomic Absorption Spectroscopy
M. T. C. DE LOOS-VOLLEBREGT and L. DE GALAN

Factors Affecting Atomization in Graphite Furnace Atomic Absorption Spectrometry
S. B. CHANG and C. L. CHAKRABARTI

Direct Analysis of Solids by Atomic Absorption Spectrophotometry
F. J. LANGMYHR and G. WIBETOE

Investigations of Some Methods Used to Reduce Interference Effects in Graphite Furnace Atomic Absorption Spectrometry
W. FRECH, E. LUNDBERG and A. CEDERGREN

Scattering in Atomic Fluorescence Flame Spectroscopy
N. OMENETTO and J. D. WINEFORDNER
